

**TAMILNADU STATE COUNCIL FOR HIGHER EDUCATION**

**Data on Academic Aspects of  
Unaided Arts and Science Colleges  
Part I**

**FEBRUARY 2004**

### ACKNOWLEDGEMENT

- The Computer Programme for this study was written by Dr.V.Joseph, Research Officer of this Council.
- The Figures were drawn by Thiru R. Srinivasan, Steno-Typist of this Council.

## **Data on Academic Aspects of Unaided Arts and Science Colleges**

In recent years there has been a marked increase in the number of unaided colleges and the proportion of students studying in these colleges has been showing a steady upward trend. This would mean, in the near future the performance of these institutions will have a substantial influence on the performance of the education system in the State. In view of this it was proposed to collect data pertaining to the academic aspects of these institutions.

Two proformas (Annexures 1 and 2), one regarding the students and another regarding the teachers were devised and data called for from all the unaided colleges. The data received have been collected and presented here.

### **Colleges**

The number of colleges in each University region is given in Table 1. The number of colleges that responded and provided data is also given in the same Table. The table also indicates, out of those responded, the number of colleges that offer postgraduate courses. The list of colleges in each University region and the code numbers assigned to them are indicated in Tables 2.1 to 2.6. The colleges that responded are also indicated in these Tables.

### **Courses**

The list of undergraduate courses offered at these colleges and the code numbers assigned to them are given in Table 3. This table also indicates the number of colleges offering each of these courses. It may be seen from this table that 55 different undergraduate courses are being offered by these colleges. However, some of these courses are offered only by one or two colleges and many of the courses are offered only by ten or less number of colleges. Only seventeen courses are offered by more than ten colleges. Out of these only six courses viz. B.Sc. (Computer Science), B.Com. BCA, BBA, B.Sc. (Bio-Chemistry) and B.Sc. (Microbiology), are offered by over 50 colleges.

The list of postgraduate courses offered at these colleges and the code numbers assigned to them are given in Table 4. This Table also indicates the number of colleges offering the postgraduate courses in the different University regions. It is seen that 37 different postgraduate courses are being offered at these colleges. However, several of these courses are offered only in one or two colleges. Only 12 courses are offered in more than five colleges. Out of these only M.Sc. (Computer Science), MCA and M.Com. are offered in more than twenty colleges.

### **Approved Intake in UG Courses**

The approved intake in undergraduate courses and its growth over a five year period (1997-98 to 2001-02) are given in Table 5 and Figures 1.1 & 1.2. This Table provides these values for each University area. It may be seen that in the whole State during the five year period the approved intake has increased by 124%. The percentage increase in intake in each of the Universities i.e. University of Madras, Madurai Kamaraj University, Bharathidasan University, Bharathiar University, Manonmaniam Sundaranar University, and Periyar University are 110, 144, 136, 149, 38 and 145 respectively.

### **Vacancies in UG Courses**

The vacancies in undergraduate courses at the time of closure of admission in the unaided colleges during the five years are given in Table 6 and Figure 2. The Table also provides this information for each University area. It may be seen that vacancies appear to be increasing for the State as a whole not only in absolute terms but also percentagewise. During 2001-02, approximately one third of the seats in undergraduate courses in unaided colleges could not be filled up.

### **Dropouts in UG Courses**

All students who join the first year do not necessarily continue their studies till the end of the third year. Some of them discontinue for various reasons. Table 7 and Figure 3 provide the extent of dropouts in the unaided colleges. Universitywise information is also available in the same

Table. It may be seen the dropout is of the order of 10%. It does not vary very much over the three year period.

### **Efficiency of the UG Programmes**

The unaided colleges have created substantial infrastructure for imparting higher education. Use of these facilities to the fullest extent will be beneficial to the State. The efficiency of the system could be measured by the ratio of the number qualified to the approved intake, i.e. the efficiency is measured by the extent to which the facilities created to educate the young ones are utilised. The efficiency values of the undergraduate programmes in the unaided colleges are given in Table 8 and Figure 4. It may be seen from these that the efficiency of the system stands at about 48%.

### **Approved Intake in PG Courses**

The approved intake in postgraduate courses and its growth over a five year period (1997-98 to 2001-02) in the State as well as in each University area are given in Table 9 and Figures 5.1 & 5.2. It may be seen that over this period, the approved intake has grown by 299%.

### **Vacancies in PG Courses**

The vacancies in postgraduate courses at the time of closure of admissions during the period under review are indicated in Table 10 and Figure 6. For the State as a whole, the percentage vacancies have been increasing from about 14% to 25% during the five-year period.

### **Dropouts in PG Courses**

Some of the students who join the postgraduate courses discontinue for various reasons. Table 11 and Figure 7 provide information about the extent of dropouts in the postgraduate courses in unaided colleges. It is 14% or about 1/7<sup>th</sup> of the actual intake for the State as a whole.

### **Efficiency of the PG programmes**

The efficiency of the system may be calculated as the ratio between the number of postgraduates produced to the approved intake. The efficiency values are provided in Table 12 and Figure 8. It is seen that the efficiency of the system is low and is of the order of 55%.

### **Performance of Individual Courses (UG)**

The performance of the undergraduate courses which are popular and are offered at a large number of colleges are indicated in Tables 13 to 16. It may be seen that the vacancy position is getting worse in the cases of B.Sc. (Computer Science), BBM and BCS; it is improving in the case of B.Sc. (Information Technology); it is no different from the general trend in respect of the other popular courses. The dropout rates are generally of the same order as for all courses put together. Efficiencies in respect of these popular courses are not different from the general trend except in the cases of B.Sc. (Computer Science), B.Com. and BCA courses where the efficiency is substantially higher than the average for all courses put together.

### **Performance of Individual Courses (PG)**

The performance of the postgraduate courses which are popular and are offered at a number of colleges are indicated in Tables 17 to 20. These tables indicate that even though the vacancy position is better in most of these courses, in the case of M.Com., the vacancies are consistently higher. The dropout rates are also generally lower in these cases. The efficiency is considerably higher in the case of M.Sc. (Biotechnology), M.Sc. (Information Technology), M.Sc. (Microbiology) and MCA.

### **Faculties**

The number of teachers working in each college, their educational qualifications and experience are indicated in Tables 21.1 to 21.6. How many of the teachers have cleared the SLET/NET examination is also indicated in the same Tables. The last column in these Tables provide the number of students (based on approved intake) per teacher. The position

for each University area and the State as a whole are available in Table 21.7.

The overall teacher student ratio is 1 : 27. There are about 6000 teachers in these colleges; out of whom 4% hold doctorate degree and another 33% hold M.Phil degree. However, only 11% have cleared SLET/NET examination. Most of these teachers have less than 5 years' experience (72%) and only about 9% have more than 10 years' experience.

The relationship between the student teacher ratio and efficiency is shown in Table 22 and Figures 9.1 & 9.2. These indicate that the efficiency is not necessarily better in the colleges with better student teacher ratios.

### **Concluding Remarks**

The unaided colleges are growing in number and during the course of the next few years, the performance of these colleges will have a decisive role in the overall performance of the higher education system of the State. The data presented here may be useful in assessing the performance of the students, the qualifications of the faculty and the general health of the unaided colleges as a whole.

**Table 1**  
**Distribution of Unaided Colleges**

S.No	Name of University	Number of Unaided Colleges		
		Total	Responded	Offering postgraduate courses*
1	Madras	81	48	17
2	Madurai Kamaraj	33	26	8
3	Bharathidasan	41	26	18
4	Bharathiar	57	25	18
5	Manonmaniam Sundaranar	16	9	2
6	Periyar	18	12	8
<b>Total</b>		<b>246</b>	<b>146</b>	<b>71</b>

\*Out of those responded, the number of colleges which offer postgraduate courses is indicated in this column.
